ADEKA Obtains ISO22301: 2012 Business Continuity Management Systems Certification

ADEKA Corporation (Representative Director and President: Akio Kohri) obtained certification under the ISO22301: 2012 international standards for business continuity management systems (BCMS) on November 29, 2013.

In recent years, an increasing diversity of risks such as earthquakes and new strains of influenza have threatened business continuity. As controlling the risks involved in business activities is an extremely important management issue, in April 2009, in order to ensure the stability of the supply of products needed by customers during crises, ADEKA launched an initiative to establish a business continuity management (BCM) system for its head office and its Soma plant, where it manufactures lubricant additives.

This initiative included risk assessments and the development of business continuity plans (BCP). In March 2010, ADEKA obtained certification under the BS25999-2: 2007 British standards. The company continued its efforts to further meet customer expectations and obtained ISO22301: 2012 certification from SGS Japan Inc., a registered certification body. The ISO22301: 2012 international standards were first published in May 2012.

The Soma plant was heavily damaged by the Great East Japan Earthquake and the ensuing tsunami, but the BCM system that had been established enabled it to fulfill its responsibility regarding the supplying of products to customers and to recover from the disaster early.

In the future, in order to improve its BCM system, ADEKA will continue to make further efforts in order to take measures to manage risk and make ongoing improvements so that it can deliver products to give customer satisfaction.

< Overview of certification obtained >

Registered business	ADEKA Corporation
Scope of certification	Manufacture of lubricant additives <ul style="list-style-type: none"> ➤ Head office 2-35 Higashi-ogu 7-chome, Arakawa-ku, Tokyo, Japan ➤ Soma plant 1-1, Koyo 1-chome, Soma-shi, Fukushima Prefecture, Japan
Certification standards	Japanese Industrial Standards JISQ22301: 2013 (ISO22301:2012)
Certificate registration number	JP13/080292
Certification body	SGS Japan Inc.
Date of certification	November 29, 2013
